Score: Incomplete

Annotation:

This exemplar is characteristic of an incomplete assignment in that it does not follow the structure of an interview narrative, but rather seems to represent a Question and Answer format. Without an organizational structure or the command of language conventions clearly designating the two different voices, the reader must struggle to make sense of the conversation. It is this lack of structure and the unclear, underdeveloped focus on the interviewee’s post high school experience that places this interview in the incomplete proficiency band. The interview does not demonstrate adequate command of grammar and conventions, nor does it provide any descriptive details to help the reader know the interviewee.
